Hello Wendy,

It was great to meet you today, I look forward to helping you launch a website in the near future. I wanted to share a link to a Google Doc containing facts about the business. I am not sure if you want the website to detail Nu-Finish's history, but this is the most information I could find online, should you want it. You can edit the document directly to modify, add, or remove any content. Since this is a big milestone—40 years servicing Garrett County—we should probably highlight that.

If you would like to view the rough draft of the website here is the link below.
https://nu-finish-site.vercel.app/
If you have any suggestions, or requests to add or remove features or information, please let me know.

If you could, please send us any digital assets you have that you would like to utilize online. This includes a high resolution logo, any imagery such as action photos of the process vehicles go through, and some before and after photos, etc. I took some photos of the front of the building one morning, but vehicles were parked out front. It would be great to capture a photo without any obstructions.

Also, I think it would be awesome to obtain some testimonials of satisfied customers and showcase them.

Please do not hesitate to reach out if you have any questions, or suggestions.

Thank you again,
Mikey

Hey Mikey!

It WAS great meeting you yesterday! Grover has talked about you a lot, and it was good to put a face to the name.

Just so you know, I am a very organized, detailed oriented person, so my OCD may kick in, LOL! However, I am very easy to work with, welcome suggestions, and seek guidance if needed. Please feel free to give me your honest expert opinion. You know WAY more about this than I do!

John and I have reviewed the doc and rough draft of the website, and we really like many of the things you have included or want to include. There are some items we would like you to change. Please change the following:

-Nu Finish moved to the current location in 1997 (according to Grover)
-no on-site towing (Action Towing is still owned by Steve Davis, and we will be removing any signage of this on the building in the new year)
-Grover says we are Valspar and DeBeer certified, no longer PPG certified.
-remove Mike Dawson off of the website as Co-Owner since we won't be publishing this website until the buyout has occurred
-Paint warranty is only 1 year NOT lifetime
-We don't want to include a free estimate button for customers to request an estimate by submitting photos. I do like this idea. However, I am going to be overwhelmed for a while and don't want customers to have a bad experience. I am currently learning to write estimates because an estimator will be a part of my job. Also, we are afraid most people will try to get estimates this way instead of going through proper channels with their insurance company.

-Remove the Detailing/Buffing piece. We only do this on cars we have repaired. John doesn't want to advertise this because we really don't offer this as a service.
-change some of the icons: Paint & Refinishing icon to a spray gun for automotive refinishing not a paint palet, Glass Replacement icon to a windsheild or car window not a house window, Repair Bays icon to a garage door not a crane, Paint Booths to a paint booth if you can find one, if not use the spray gun from the Paint & Refinishing icon
-change the colors on the website to lime green, black, white, silver or white
-use the process detailed for insurance work in the pamphlet I will send you to replace the process on the website. The customer pay jobs go through the same process as an insurance claim customer other than the customer pay client would give the approval of the estimate instead of the insurance company.
-sub-contracted services are also included in the pamphlet that you can add if you don't already have them included
-please include our commitment statement which is on the pamphlet as well

*considerations for our web address, we discussed since Nu Finish is so popular...
nfcc
nufincc
nfinishcc
nfinishcollision
nfinishcollisioncenter
nfinishcollisioncenterllc

I will work on getting pics of the building, the finishing process, and staff. I may even try to take some videos if you think that would be something useful. We are going to make some changes to the inside of the front office, so I won't include those because that will be a work in progress as we get time and not until after the buyout, LOL! I will send you access to my Nu Finish folder from my Drive, Canva creations (pamphlet and business card), and our logo. I will send you pics of our race car as well.

I remembered my question from the other day when I met you. I used AI to help with our commitment statement, refinishing process, and transition letter. Do we need to worry about copyright issues, or do I need to reference or cite anything for these documents?

I know this seems like a lot, but please don't rush because we have plenty of time! I like to be prepared, not procrastinate until the last minute. This allows us time to get it right. It will be AMAZING, when we are finished!

Thank you so much for your help and hard work!

*attached each type of file I have for logos (the one that says "green" in the file name is one from Tease Me Tees in Oakland all others come from the license attached)
*Race photo was taken by Randy Murphy. This is the current car this year. I will get you other pictures from the past, but don't have time today because we are going racing this evening, LOL!)

*OOPS!

The colors are lime green, black, white, silver, or gray. Just like in the newer logo.

Thanks again!

Hey Wendy,

Thank you so much for the detailed notes. My wife and I are excited to help bring this together. I will bring her in one day so you can meet her too. She did already begin making some changes to the page if you would like to preview them at https://nu-finish-site.vercel.app/

We will carefully review each item and update the website content to reflect the correct history, services, certifications, warranty details, colors, icons, and overall process.

All of the resources you sent are very helpful and I really appreciate them. Videos could definitely be useful too, we can even incorporate them into the design to bring the website to life, so feel free to send anything you think may be relevant.

Regarding the AI-assisted wording, I don’t think you need to cite AI for general business copy. I reviewed the wording, and it seems well-written and concise.

Thanks again for taking the time to organize all of this. The detail is genuinely helpful, and I agree — once everything comes together, it's going to look amazing.

Mikey

Hey Mikey!

I wanted to let you know I added a folder for pics and videos to the Drive Nu Finish folder. It does have some pics and videos of the shop, process, and race car. I will continue to add to the folders as I'm able to take more pics and vids.

I peaked at the changes you and your wife have already made to the website. LOVE it!

Thanks again!

Awesome, thank you so much! I am happy that you like the changes so far. I also sneaked a peek at the pics and videos you sent earlier today and I am so excited to see what we can do with them. Seriously though, I truly appreciate you taking the time to capture and share these moments. I will keep you posted as we progress.

Good morning, Mikey!

I wanted to let you know I have added another short video I put together of a 2016 Camaro for a customer from Virginia. She used to live in this area, but has since moved away. She and her husband only wanted Nu Finish to repair her vehicle, which is why she traveled about 3.5 hours for her vehicle to be repaired. Her car was hit in the rear. Unfortunately, I didn't get a picture of it before it was repaired. This vehicle is also in the picture I recently added to our pamphlet on Canva, with the owners' permission. We asked her to write a testimonial for us, and she was happy to do so. She added a review on Yelp. I will paste it below for you to use on the website.

This week, I have begun taking pictures of vehicles before/after we repair them so we can add them as well. I am doing my best not to include the license plate, but please double-check I didn't miss one for me. I will add those pics to the folder as we finish the jobs this week. I am also still working on other pics for the complete process.

Please let me know if there is anything else you need from me, and I will get on it! Have a great day!

Thanks again!

I can't say enough good things about this collision center. Being in an accident is stressful, but they made the entire process so much easier. From the moment I walked in, everyone treated me with kindness,

respect, and professionalism. They kept me updated every step of the way, answered all of my questions, and truly made me feel like they cared. They even dealt with the insurance company which took so much stress off of me.
When I picked up my vehicle, I was amazed. It looked absolutely PERFECT! Better than off the showroom floor. This is the only place I would allow to touch my car. The quality of the work is outstanding, and their attention to detail is matched by no other. It's hard to find businesses that genuinely take pride in what they do and do it right but this team definitely does.
I highly recommend them to anyone who needs collision repairs. Thank you for your incredible work and for making such a stressful experience a positive one!

Hey Wendy,

This is fantastic! We will have to find a great place to display it. Would you like to have a photo gallery on the website to
